

Mass Timber Symposium

The Mass Timber Symposium will build capacity in the New York state architecture, engineering, and construction communities to design and deliver the full potential this new approach offers.

Experts in the emerging field of mass timber construction will share information about topics including current projects, upcoming code changes, and keys on how to deliver a successful mass timber project in North America. The afternoon discussion will extend to include the European experience and the future of mass timber in North America.

April 1, 2020

8:30 a.m. to 5 p.m.

**The Marriott Syracuse Downtown
Syracuse, New York**
